

Group Meeting Report

1 Agreements

We all agreed on using Java as the main language for this project.

1.1 Members and Skills

- Nils: Java, GitHub, worked as a full-stack dev
- Felipe: Java, GitHub
- Erik: Some ML, ANN, General OOP
- Pablo: Java, GitHub, various programming languages
- Mikel: *Unknown**

1.2 Communication

Our group chose Slack as the official communication channel.

1.3 CVS and Open Tasks

GitHub and Git Projects will be used as the versioning system and also to keep track of current and finished tasks.

1.4 Assistance on Lab Sessions

No issues with assistance (everyone will attend).

1.5 Documentation

JavaDoc will be used as it's a robust and automated solution for this.

1.6 Code of Conduct

We all agreed on the following rules:

- Not miss deadlines.
- Make unit tests for developed functions.
- Follow documentation rules for JavaDoc.
- Notify if someone can't show up to a group meeting (15 mins before at least).

1.7 Code Conventions

- Camel Case for Functions and Snake Case for variables.
- Summarized explanation for functions on comments before it.
- New code must pass tests before being merged with the main branch.
- Pull-requests must be peer-reviewed and accepted before merging with main branch.
- All pull-requests must be linked with an issue.
- All issues must have their own cards on Git Projects.
- New code must be developed on new branches and not directly on the main branch.
